To whom it may concern

I am enquiring as to whether I can get permission to use your woodland at Croxley green.

I have a small business teaching Bushcraft which includes basic living skills such as Fire making, Water purification, Shelter building, Navigation (Natural and Map and Compass) to name but a few.

My website is www.mintakabushcraft.co.uk where you can find much more information on what I do.

While teaching on your land I would be able to assist in keeping the place tidy and will do regular checks of potential dangers possible falling trees or any other potential hazards of the outdoors.

I would need permission from you to build fires that will at all times be completely under adult supervision never left unattended and will be completely removed from sight at the end of any session.

After having spent the last 2 years over at Camberley in Surrey, I'd like to broaden my horizons, I want to spread what I teach in more places and have found your property to be an exceptional place to teach people including your local community, I mainly aim at children, although I get frequent requests from adult groups, I know technology is a major part of kids lives, but I want to give them a break from it all and there is no better way than getting the kids out into the wild and teaching them how to take control of their own lives with the most basic of skills, I feel it not only teaches them to take care of themselves but also to help others and also their environments.

My Qualifications are :-

DBS enhanced

Bushcraft Instructor NCFE level 4

First aid Rec 2

BCU 2 (Canoeing)

Natural Navigation (Instructor level)

Map and compass NNAS Gold level

I have also completed courses in Woodland Management and various courses on plant and tree identification.

Thank you for your time

Carl Alsop

Fun for the whole family – treat your loved ones to an amazing day out.

WELCOME TO MINTAKA BUSHCRAFT

Here at Mintaka Bushcraft we are aiming to give children and adults an escape, an escape from the constant hassles of technology.

Although computers are an important part of our everyday lives at the moment, taking a break from it all, we feel is a necessity. Put all that technology and stress behind you for a day or two and relax in the woods.

Come and see first-hand what it's like to start your own fire, using many different methods.

Procure, filter and purify your own water in order to make it safe to drink.

Build a shelter, either for the night or just the day we all remember what it was like when we were kids, building a camp was fun, well we here at Mintaka Bushcraft have not grown out of that, it still is fun.

We teach the use of map and compass and even how to find your way around without map and compass using what nature has to offer at all

times of the year.

You will even learn a few wild plants edible medicinal and poisonous, on the way round.

Come and try one of our courses, and have some relaxing fun on the way to learning new living skills.
